CONTENTS

A decorative vertical bar on the left side of the page, consisting of a series of hexagons. The top four hexagons are dark blue, and the bottom six are a lighter blue.

PURPOSE AND FUNCTIONALITY

“PayPal with Fee” is a module developed by 4webs in order to made the percentage of commission generated in the purchase through PayPal to be paid by the buyer. This commission can be easily determined and published by the seller, and will appear on the final bill itemized under the concept of “Shipments”. In the new version, it is given option to display decomposed taxes on the invoice.

Among its many features is the ability to set a maximum amount, from which the module is disabled. You can also select individual categories that do not want to sell through PayPal. It is also possible to restrict payments by country, user groups or categories of products.

TECHNICAL DESCRIPTION AND REQUIREMENTS

VERSION: 3.0

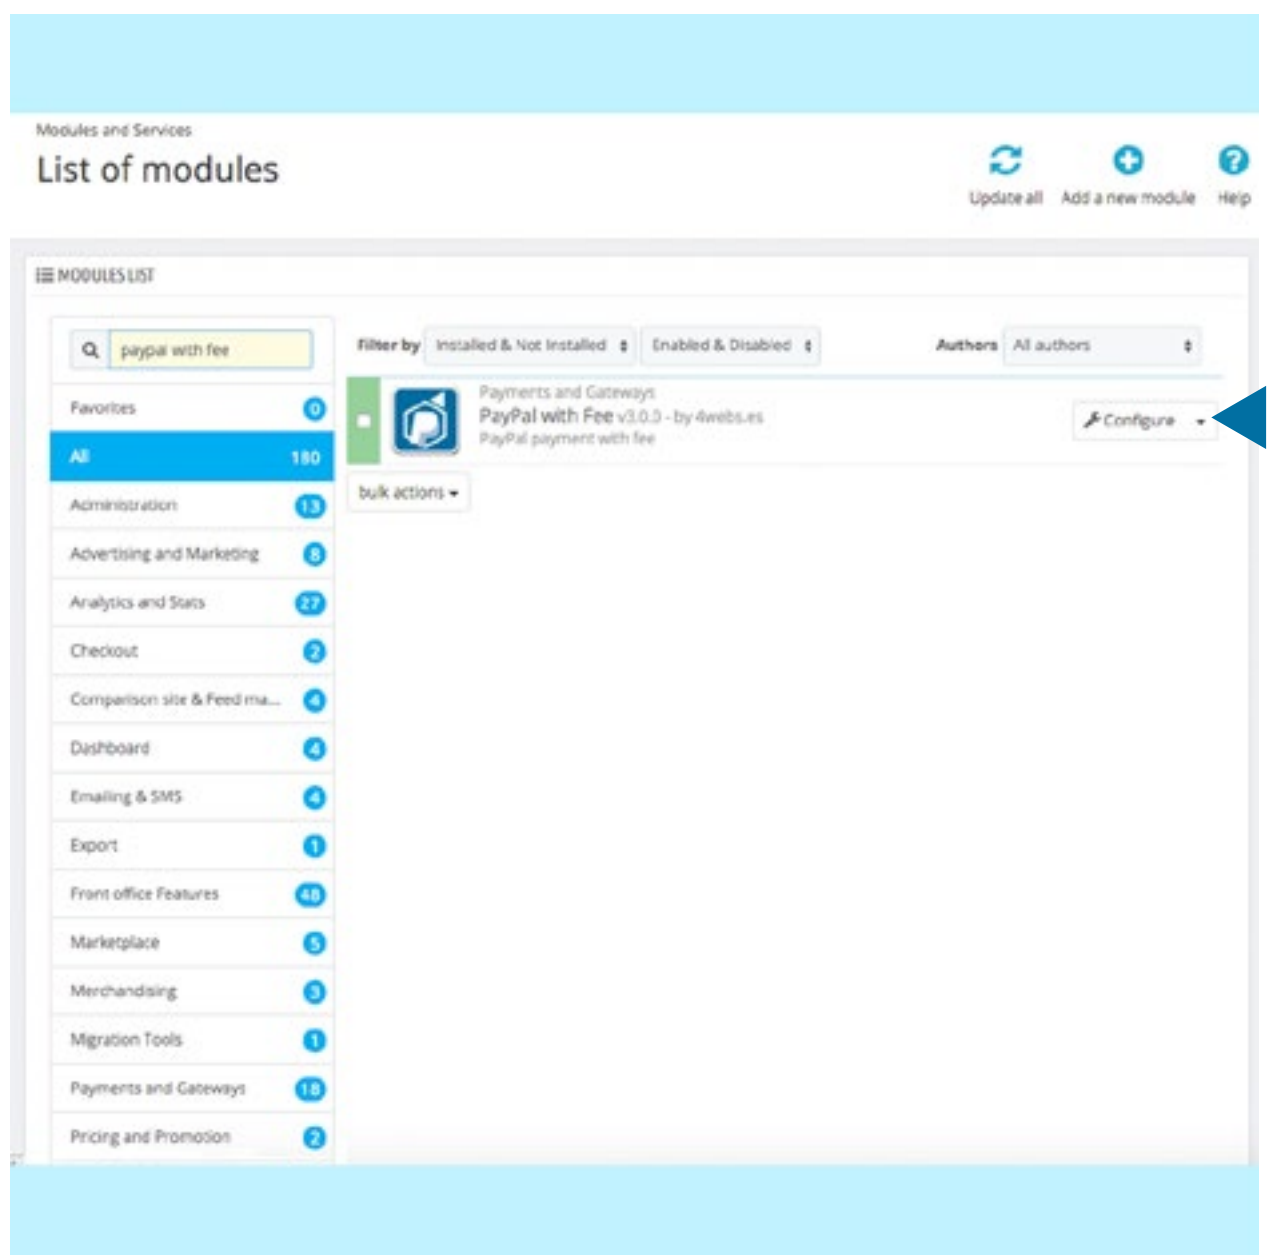

COMPATIBILITY: v1.5.0.0 - v1.6.1.3

LAST UPDATE: 29/01/2016

INSTALLATION AND CONFIGURATION

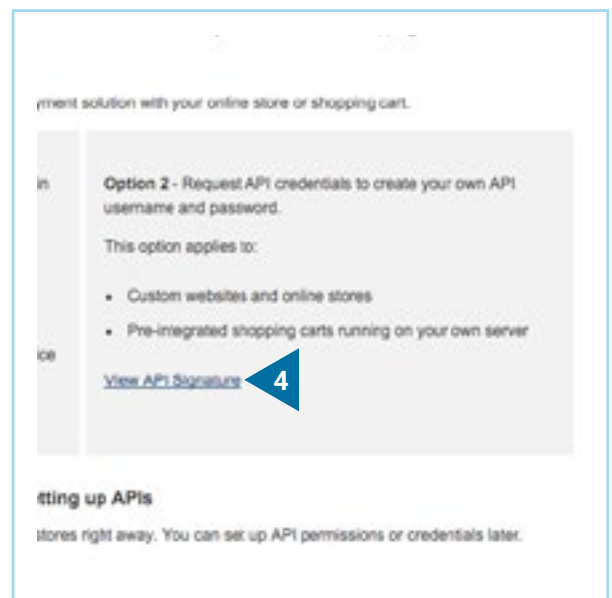

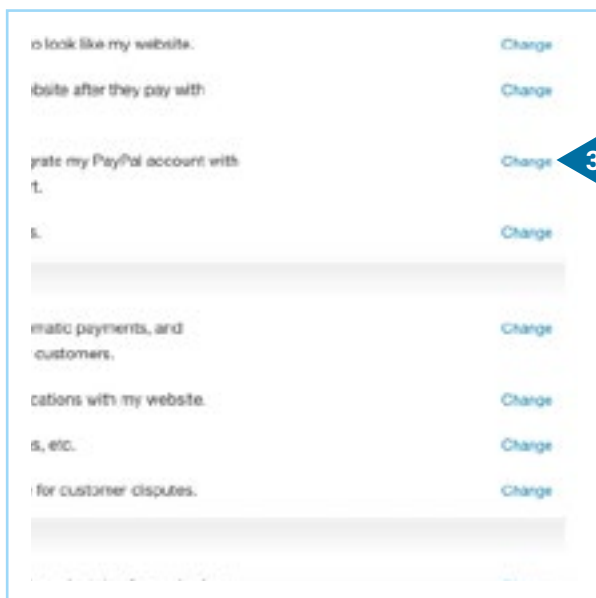

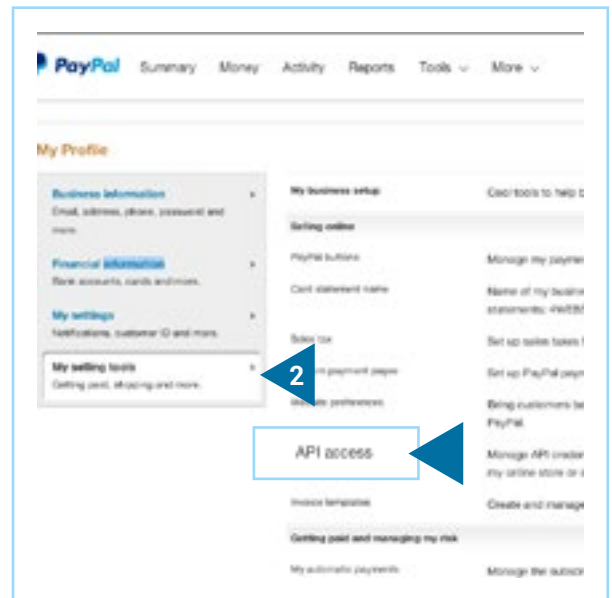

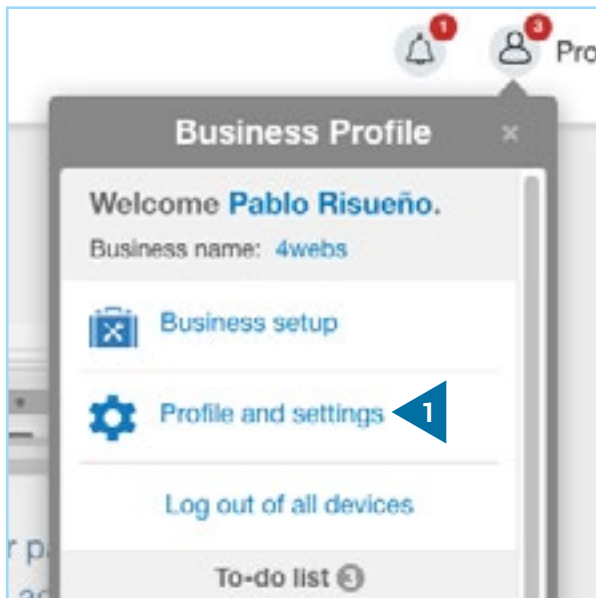

First, you need to upload the file to the server module. Later, you can find it in your browser module and click on the option "Install".

Next, are shown different screenshots that graphically explain the simple setup process of "PayPal with Fee". Once installed, locate the module at your Prestashop list and access to your choices via the "Configure" button showed in the image below.

Once inside, you will find the following options:

1. On the first tab configuration must enter the credentials of your PayPal account. **On the next page, we attach a sequence of screenshots explaining the steps to obtain your API credentials at your PayPal account.**
2. Select this option to perform tests, only permissible if you have an account with "Sandbox". You can create your own the following link: https://developer.paypal.com/docs/classic/lifecycle/sb_create-accounts/.
3. Enter your API username here.
4. In this field you must type your API password.
5. Finally, enter your PayPal API signature.
6. Before proceeding with the module configuration, save all data entered so far.

We continue setting the following options:

The screenshot shows the 'Configure PayPal with Fee' interface. At the top, there's a breadcrumb trail: 'Modules and Services / paypalwithfee / Configure'. Below this, the title 'Configure PayPal with Fee' is displayed. To the right of the title are four icons: a circular arrow (Back), a flag (Translate), a refresh symbol (Check update), and an anchor (Manage hooks). The main content area is titled 'PayPal with Fee' and contains three tabs: 'PAYPAL CREDENTIALS', 'EXTRA FEE AND LIMITS' (which is selected and has a blue arrow pointing to it labeled '1'), and 'MORE OPTIONS'. The 'EXTRA FEE AND LIMITS' tab contains four input fields, each with a blue arrow pointing to it labeled with a number from 2 to 5. The first field is 'Percentage of the fee' with the value '3.4' and a note 'Example: 5% amount. Set 0 to disable.' The second field is 'Fixed fee (optional)' with the value '0' and a note 'Example: 10€ amount. Set 0 to disable.' The third field is 'Limit payment to' with the value '0' and a note 'Maximum payment for Paypal in store. Set 0 to disable.' The fourth field is 'Disable Paypal by category' with an empty text area and a note 'All cart that will be with any product in this categories. Enter categories by id like: 6,2,3,14'. At the bottom right of the form is a 'Save' button with a floppy disk icon, labeled with a blue arrow and the number '6'.

1. We access through to the second tab options "Extra Fee and Limits"
2. At this point, set the percentage of commission of PayPal to pay for the customer.
3. Here you can determine a fixed fee for PayPal payments. To disable this option, enter the value "0". It will add to the surcharge applied in point 2.
4. In this section, you have the option to set a maximum accepted PayPal payment amount.
5. At this point, you can choose the categories of products for which you want to disable the option of payment through PayPal. You must enter the "id" of this or these product categories, separated by commas if there is more than one.
6. Save all the data entered before continuing.

Next, we continue to set the last parameters:

The screenshot shows the 'Configure PayPal with Fee' interface. At the top, there's a breadcrumb trail: 'Modules and Services / paypalwithfee / Configure'. Below this, the title 'Configure PayPal with Fee' is displayed. To the right of the title are four icons: 'Back', 'Translate', 'Check update', and 'Manage hook'. Below the title, there are two 'See in addons' buttons. The main content area is titled 'PayPal with Fee' and contains three tabs: 'PAYPAL CREDENTIALS', 'EXTRA FEE AND LIMITS', and 'MORE OPTIONS'. The 'MORE OPTIONS' tab is selected and highlighted with a blue arrow labeled '1'. Inside the 'MORE OPTIONS' tab, there are three settings: 1. 'Tax' is set to 'IVA ES 21%' with a dropdown arrow, highlighted with a blue arrow labeled '2'. Below it is the text 'Select if fee uses tax:'. 2. 'Custom Invoice' has two buttons: 'YES' (highlighted with a blue arrow labeled '3') and 'NO'. Below it is the text 'Yes = Allow download custom invoice (Order panel) || No = Custom invoice not allowed.'. 3. 'Currency position before' has two buttons: 'YES' and 'NO' (highlighted with a blue arrow labeled '4'). Below it is the text 'Yes = Before amount like €2.00 || No = After amount like 2.00€.'. At the bottom right of the settings area is a 'Save' button with a floppy disk icon, highlighted with a blue arrow labeled '5'.

1. Access the "More Options" tab.
2. Decide if you would like to introduce tax charges in this invoice.
3. Enable the "Yes" if you want to make a custom invoice for this charge. Then you can download it in PDF. Also, we specify that you must enable this option if the point 2 ("Tax") is operating.
4. You can edit the position for the monetary symbol, depending on whether you want to appear before or after the numerical figure of the price.
5. Save the settings on this screen.

In the following screenshot, you can see that if you access your Prestashop "Orders" section, no status leads attached invoice, so we should disable the option to send PDF via e-mail.

The screenshot displays the Prestashop 'Orders' section. At the top, there are navigation links: 'Add new order', 'Recommended Modules and Services', and 'Help'. Below this, there are two summary cards: 'Average Order Value 30 DAYS 27,00 €' and 'Net Profit per Visit 30 DAYS 0,90 €'. The main area shows a list of orders with columns: ID, Reference, New client, Delivery, Customer, Total, Payment, and Status. A blue arrow points to the 'Status' column of the first order, which is 'Pago aceptado'.

ID	Reference	New client	Delivery	Customer	Total	Payment	Status
7	BLTSOSSYM	No	España	T. test	34,01 €	PayPal with Fee	Pago aceptado
6	YJMPWTWU8	Yes	España	T. test	34,01 €	PayPal con Recargo	Pago aceptado
5	KH-WULZLL	No	EE.UU.	J. DOE	71,51 €	Bank wire	Pago por transferencia bancaria pendiente
4	FFATNOMMJ	No	EE.UU.	J. DOE	89,89 €	Payment by check	Pago mediante cheque pendiente
3	UOYEVOLI	No	EE.UU.	J. DOE	76,01 €	Payment by check	Error en el pago
2	OHSATSERP	No	EE.UU.	J. DOE	75,90 €	Payment by check	Pago mediante cheque pendiente
1	XXBKUABJK	Yes	EE.UU.	J. DOE	55,00 €	Payment by check	Cancelado

Once made the steps above, you will find the module results in the same module “Orders” section. To do this, go into the specific order:

The screenshot displays the Prestashop 'Orders' module interface. At the top, the title 'Order BLTSOSSYM from Test test' is visible. Below the title, there are tabs for 'ORDER' and 'CUSTOMER'. The 'ORDER' tab is active, showing details for order #7. The 'CUSTOMER' tab shows details for 'TEST TEST' #2. The order status is 'Pago aceptado' (Accepted payment) with a date of 02/01/2016 09:56:52. A green bar indicates the status. Below this, there is a dropdown menu showing 'Pago aceptado' and an 'UPDATE STATUS' button. To the right, there is a 'PRIVATE NOTE' section. Below the status bar, there are tabs for 'PAYPAL WITH FEE', 'SHIPPING', and 'MERCHANDISE RETURNS'. The 'PAYPAL WITH FEE' tab is active, showing details about the PayPal fee, tax, and transaction ID. A blue arrow points to the 'PAYPAL WITH FEE' tab. Below the details, there is a 'Download Invoice' button, which is highlighted with a blue arrow and the number 2. The right sidebar shows customer information, including email, account registration date, and total spent since registration. It also includes a 'SHIPPING ADDRESS' section with a map of Valencia.

1. This is the tab where you will find the data in this order with fee.
2. Click this option to generate and download your invoice in PDF format. To avoid modifying Prestashop drivers, the module does not cancel the generated invoice, but generates a new one with the new features.

For when you may need, you will also find the ID of this order:
